

PREMIUM PETE

DADDY PETE'S SEA N' FARM POTTING SOIL

With a strong effort to promote sustainable gardening, we have created Daddy Pete's Sea n' Farm Potting Soil as a premium potting soil for indoor and outdoor container plants. It is a unique blend of Daddy Pete's Composted Cow Manure, sphagnum peat moss, premium aged pine bark fines, perlite, sandy loam, oyster shell, oceanic fish meal, crab meal, shrimp meal, earthworm castings, fossilized bat guano, and kelp meal.

The beneficial micro-organisms provided by Daddy Pete's Composted Cow Manure, which is part of Daddy Pete's Sea n' Farm Potting Soil, allow nutrients to become more available for the plant, and can aid in defending plants against viral, fungal, pathogenic, root, vascular, and foliar diseases.

INGREDIENTS
